SKC Partners with Aruba Networks

SKC adds Aruba Networks to expansive manufacturer portfolio.

SHAWNEE MISSION, Kan. – SKC, a leading communication technology integrator, is excited to announce its partnership with Aruba Networks.

Aruba Networks designs and delivers mobility-defined networks that empower a new generation of tech-savvy users. At a time when workers are becoming more mobile and demanding workplace flexibility, Aruba Networks offers solutions that bring secure access beyond physical boundaries.

“SKC is very excited to add Aruba Networks to our product portfolio. Aruba Networks provides a comprehensive suite of products that allow our customers to handle the high demands of BYOD, GenMobile, guest access and Microsoft Lync.”

Chief Technology Officer at SKC, Jeff Holton, looks forward to offering the Aruba Networks solutions as “it is a vital piece to allowing our customers to deploy Lync at the desktop and successfully supporting all modalities of communication.”

About SKC Communication Products, LLC

Founded in 1986 as a Plantronics headset distributor, SKC has grown to become a full-service communications technology integrator, offering solutions in headsets, voice, videoconferencing and audio/visual integration. SKC designs, builds and manages technology for enterprise collaboration using video, voice and AC technologies. Visit SKC's website at www.skccom.com and connect with us on Facebook, Twitter, and LinkedIn.
