

SITUATION

The University of Kansas wanted to create a lasting impact within the university and business community that would provide an innovative learning environment for students. The next generation of the business community is constantly in collaboration and KU needed that implemented throughout their technology.

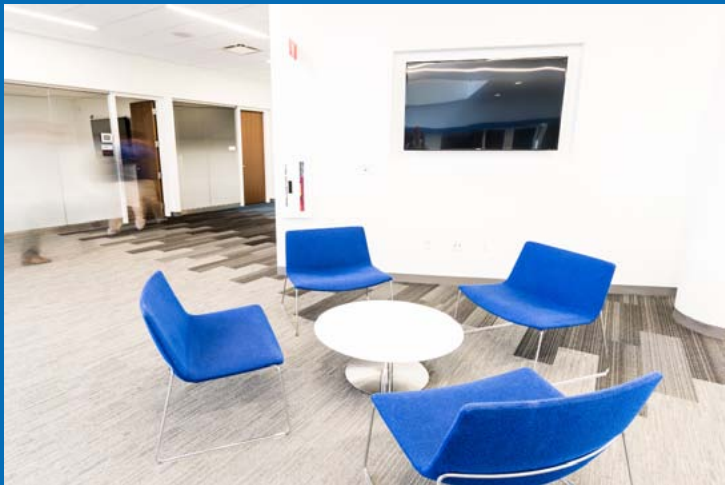

SOLUTION

SKC Communications provided all of the hardware, installation and programming for the new University of Kansas School of Business in Capitol Federal Hall. The building consists of multiple scale-up technology classrooms as well as an Auditorium and Finance Lab with real time market status via stock ticker. The Atrium features both a large and small video wall for digital signage and presentations.

RESULTS

Capitol Federal Hall has opened its doors. This 166,500 square-foot building will serve as a destination point for students who are determined to move business forward. From state-of-the-art technology to research labs, this will be a hub for collaboration and innovation.

The building features 20 classrooms, a 350 seat auditorium, and 25 collaborative spaces.

The University of Kansas is now equipped as a central hub for student-run startups with all the tools and resources to grow.
