

### SITUATION & SOLUTION

Commercial Developer Murphy Real Estate Service approached SKC Communications about a new project. They were looking at renovating the Old Chicago Hospital. This project was for a food court that's open to the surrounding businesses to utilize throughout their day. This space is also available for privately hosted events.

### RESULTS

SKC's design team worked with the client and the consultant to create an audio system, paging system, wireless and wired internet system, and security camera connections. These systems cover the entire space and provide an enjoyable and lasting impression to patrons as they eat and stay at the Old Chicago Hospital.

### TECHNOLOGIES USED

- > Atlas
- > Belden
- > Middle Atlantic
- > Ubiquiti
